One of the main objectives of the conference is to share knowledge about new instruments, policies and strategies aimed at sustainable development, from the interdisciplinary domains of accounting, economics, and environmental planning and management. Another important objective of the conference is to promote a constructive and informal environment that encourages a critical reflection and discussion about these matters. GECAMB 2014 will also include a session for the discussion of PhD and Masters Projects in this area, which allows young researchers to present their research projects and/or first results of their work for analysis and discussion. Each project discussion will be led by a discussant.
